EDUCATION

BS	University of Colorado, Boulder	Anticipated Graduation August 2026
	Computer Science Post-Baccalaureate Program	
MSc.	University of Colorado, Colorado Springs	May 2023
	Applied Physiology Master's Thesis: "Muscle & Skin Temperatures Influence Post-Exercise Hypotension."	
BS	North Greenville University	August 2020
	Exercise Science	

RELEVANT RESEARCH EXPERIENCE

Master's Laboratory Experience and Skills

- Measurements of blood flow using ultrasound doppler, laser doppler probes
- Measurements and instrumentation of blood pressure, ECG, and arterial stiffness
- Instrumentation and calibration of skin thermocouples and telemetric pill sensor
- Pulmonary function testing using spirometry for volume and flow measurements
- Submaximal and maximal exercise testing protocols using indirect calorimetry
- Participant instrumentation and measurement collection

Master's Thesis Human Research Experience

- Ethical approval procedures and protocols for human research
- Participant recruitment and health risk screening
- Study protocol design, data collection, analysis, and interpretation

Undergraduate Research Experience

- Conducted primary human research for class requirement to investigate the effects of sex on lactate threshold during endurance running events
- Prepared an abstract and manuscript without publication

Additional Skills and Experience

- Electronic Medical Records (EMR) systems, including EPIC and Patient IQ
- Conducted participant consenting processes, ensuring compliance with ethical standards
- Proficient in various research methodologies and tools, including statistical softwares (Python, R, Microsoft excel)

Professional Certifications

- National Strength and Conditioning Association CSCS June 2021
- American College of Sports Medicine Certified Personal Trainer January 2020

APPLIED EXPERIENCE

Clinical Research Associate Sports Medicine	March 2026 – Present
The Sports Center – CommonSpirit Sports Medicine	
• Collected, coded, organized, and analyzed research data to support study aims, data quality, and interpretation of findings across multiple projects.	

- Collaborated with Principal Investigators on study design, research planning, and protocol development, contributing to both project strategy and scientific direction.
- Conducted literature reviews and synthesized findings to support study development, manuscript drafting, and publications.
- Prepared manuscripts, abstracts, posters, and presentations for research meetings and in publications.
- Maintained detailed regulatory, study, and project documentation while ensuring compliance with IRB, FDA, protocol, and SOP requirements.
- Reviewed participant medical histories, assessed eligibility criteria, obtained informed consent, and educated prospective subjects on study participation.

Research Services Professional | Orthopedics

August 2023 – July 2026

University of Colorado, Anschutz Medical Campus

- Collected, organized, and analyzed research data, maintaining detailed records to ensure compliance with regulatory standards.
- Developed protocol-specific documents and systems, identified operational issues, implemented recruitment strategies, and participated in study initiation duties.
- Identified and assisted with grant applications, ensuring alignment with research objectives and funding requirements.
- Initiated research ideas, determined feasibility, organized entire project responsibilities, designed research projects, developed protocols, and conducted literature reviews to support project aims.
- Developed and shared research resources at the department level, provided feedback on manuscript writing for student mentees and research fellows, prepared presentations for research dissemination to medical professionals, and contributed to timeline development for the fellow research program.
- Presented research findings at domestic and international conferences, developed scientific posters, and mentored students in preparing their presentations.
- Collaborated with other laboratories, research teams, and academic institutions to enhance research efforts and disseminate findings, engaged in company-level research outside of assigned clinical trials, and contributed to project design at a multi-site level.
- Screened and interviewed prospective participants, ensured informed consent, and verified eligibility based on medical history and research protocols.

Graduate Teaching Assistant | Human Physiology

August 2022 – May 2023

University of Colorado, Colorado Springs

- Instructed undergraduate students on human physiological processes, including brief lectures and hands-on demonstrations.
- Contributed to the development and enhancement of curriculum to support research-led student learning, integrating the latest scientific findings.
- Demonstrated physiological measurement techniques in both resting and exercise conditions, ensuring students gained practical skills and understanding.
- Assisted students in understanding the practical applications of human physiology education, bridging theoretical knowledge with real-world applications.

- Provided additional support and guidance during lab sessions, fostering a collaborative and engaging learning environment.
- Evaluated and graded student performance, providing constructive feedback to help improve their understanding and skills.

RELEVANT COURSEWORK

Master's Coursework	Undergraduate Coursework
• Cardiovascular physiology • Advanced exercise physiology • Research & Statistical Design • Sex Differences in physiology	• Data Science • Machine Learning • Introduction to Artificial Intelligence • Discrete Structures

PUBLICATIONS AND MANUSCRIPTS

Publications

1. **Rowe, B**, Heylmun, L, Keeter, C, Pino, A, Ellman, M, and Genuario, J: *Evaluating Joint Space Width and Hip Morphology in Symptomatic Female Hips with Femoroacetabular Impingement and Instability*.
2. Heylmun, L, **Rowe, B**, Mardaus, K, Genuario, J, and Ellman, M: *Future Technologies and Hip Arthroscopy: Recent Innovations in the Management of Hip Preservation Surgery*.
3. Garvin, P., Kolaczko, J., Heylmun, L.M., **Rowe, B.**, Wait, T.J., Glynn, E., Griffith, E., and Genuario, J: *A Biomechanical Analysis of a novel Interlinked Suspensory Fixation Technique in Quadriceps Tendon Autograft ACL Reconstruction with a Clinical Correlate*

Manuscripts in Preparation

2023 – Present

1. Rowe, B, Tracy, P, Frerichs, J, Morris, N, and Pearson, J: Influence of Lowered Muscle Temperatures upon Post Exercise Hemodynamics
2. Rowe, B, Heylmun, L, Keeter, C, Ellman, M, and Genuario, J: Association between Beighton Score and Radiographic Parameters of Hip Instability.

HONORS AND AWARDS

Graduate Research Fellowship 2021
This scholarship is a nomination-based award for graduate students working under a mentor/advisor on a research project (thesis, publication, etc.)

Outstanding Graduate Award 2023
This nomination-based award is given to one graduate each term and thus is a testament to their dedication, hard work and passion for the field of physiology.
